Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-13, 17, 24-36 and 38-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB '092 in view of GB '388.

GB '092 teaches the production of powder coating compositions comprising thermosetting resins among others, pigments including aluminum alloys and corrosion inhibitors (see abstract, page 5, lines 14-21 and page 9, line 13). The further incorporation of aluminum silicate and zinc oxide are taught at page 9, line 15 and page 10, line 3. These compositions are taught as suitably applied to metal substrates.

The primary reference fails to explicitly recite the incorporation of metal flakes, specific amounts of metallic pigment and zinc oxide, particle sizes of the stabilizing additives and the application to substrates other than metal.

Regarding the use of metal flakes, the '388 reference teaches the use of aluminum flakes to similar powder coating compositions.

Regarding the relative amounts and particle sizes recited in the instant claims, it is the position of the examiner that these amounts would have been obvious to one of ordinary skill in the art desiring to tailor the compositions to a specific application.

It would further be obvious to one of ordinary skill in the art to apply these compositions to non-metallic substrates with reasonable expectation that suitable results would ensue.

Art Unit: 1714

Claim 4 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim 4 has not been further treated on the merits.

Claims 14, 15, 18-23 and 37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (703) 308-0042. The examiner can normally be reached on M-F from 10:00 to 6:00.
